Cloud foundry environment variables

Quiz 8 | 6 Questions

[Start Quiz](#)[Skip Quiz](#)

Which one is NOT a environment variable type

- 1 Application
- 2 Instance
- 3 User provided
- 4 Environment variable groups
- 5 Organization

Which one is NOT a environment variable type

Application

Instance

User provided

Environment variable groups

Organization

Good job, please continue to the next question.

User defined environment variables have the same value for all instances

1 True

2 False

User defined environment variables have the same value for all instances

True

Good job, please continue to the next question.

False

User defined environment variables can be defined at organization level

1 True

2 False

User defined environment variables can be defined at organization level

True

False

Good job, please continue to the next question.

Which one is an example of instance level environment variable

- 1 IP address
- 2 User defined property (e.g., Stage)
- 3 Route
- 4 Memory limit
- 5 Port

Which one is an example of instance level environment variable

› This was discussed in Lecture 20: **Cloud Foundry Environment Variables**

IP address

Good job, please continue to the next question.

User defined property (e.g., Stage)

Route

Memory limit

Port

Please try again.

Environment variables are set by the CF components such as DEA and they are set by the build pack as well

1 True

2 False

Environment variables are set by the CF components such as DEA and they are set by the build pack as well

True

Good job, please continue to the next question.

False

The user defined environment variables (properties) may be managed by using the IBM Bluemix console

1 True

2 False

The user defined environment variables (properties) may be managed by using the IBM Bluemix console

True

Good job, please continue to the next question.

False

Great job! You are ready to move on to the next lecture.

You got 5 out of 6 correct on the first attempt.
