Install Eclipse

5. Install the eclipse IDE by executing the downloaded installer file

6. Execute eclipse IDE – when prompted create a new workspace. We will create all our Bluemix projects under this workspace. We will refer to this workspace as *Bluemix* workspace

Point this to directory for workspace
Desktop.....\Bluemix Course\workspace

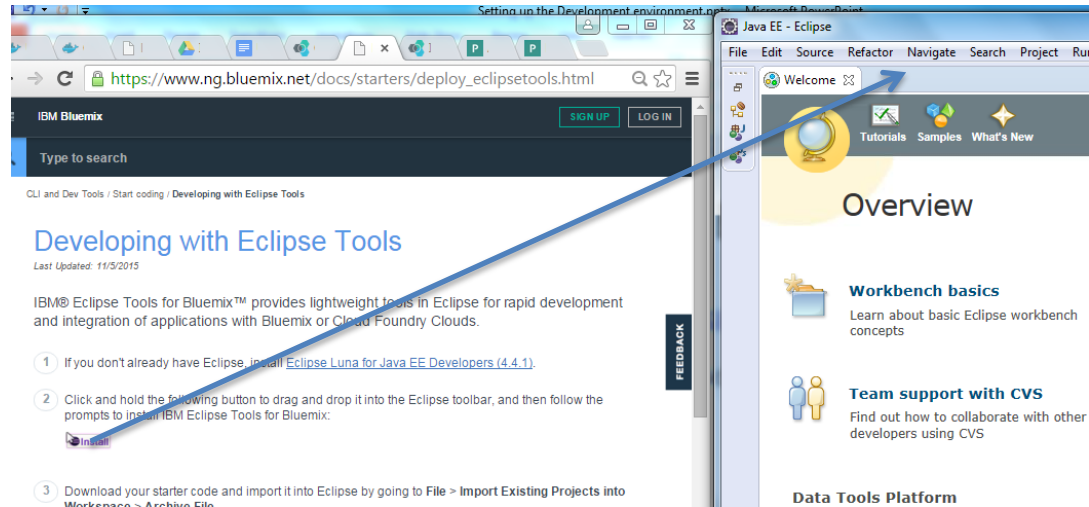

Install Bluemix Eclipse Tools

7. Go to the link

https://www.ng.bluemix.net/docs/starters/deploy_eclipsetools.html

8. Run the IDE – open it side by side to the browser – drag the  button to the eclipse toolbar

Install Bluemix Eclipse Tools

9. Select the Bluemix tools to install

IBM Eclipse Tools for Bluemix

Enables rapid deployment and integration of applications with IBM Bluemix or the Cloud Foundry Clouds, including support for JavaScript and EAR publishing. A... [more info](#)
